RECENT PROJECTS

Sports betting platform with dynamic odds. MacroBet is a fully functional sports betting platform, developed from scratch, which hosts 14 sports with live feed and stats, can handle deposits and withdraws to various sources and meets all gambling commission requirements. Link: <https://macrobet.com/home/index>

Freelancing platform for non-IT professionals. Using a bid system. Link: <https://ucomparebids.com>

Social network platform to discuss investments, with tools to manage and plan investments and personal finances. Link: <https://sharpdimes.com/>

A first ever spell checker for Turkmen language. Based on a spell-checking engine I created, which can consume digital material in any language and learn to spell in it. Engine can learn to spell check in any language it is given input in. Link: <https://yazuw.com>

Quiz generating platform. Developed to create personality tests, platform can generate custom quizzes and report on the results. <https://personalcorevalues.com/>

Product opportunity discover tool. An app that can be used by sellers on amazon and similar platforms to discover trends and possible niche markets. App would use google trends, facebook search statistics, amazon and Walmart product sale statistics.

Antivirus application to detect and remove malware, with live protection capability. Program would make use of a malware database of hashes to constantly monitor running programs and open windows, any inserted media is scanned as well.

“Sales Manager TM” is POS application for Supermarkets and Retailers in Turkmenistan.

“KRS 4” is a CRM/POS application for small and medium sized businesses in Turkey.

“Lecture Box” application developed for a company managing number of colleges and education centers in Germany, developed as a freelancer.

“SelfieBoxx” a photobooth application, utilizing Canon API, with ability to manipulate image with various filters, print, and shar to social media. Application also makes use of Instagram, Facebook and Twitter API. For a client from Jordan, but for worldwide usage, developed as a freelancer.

“Medic Card” an application for clinics and hospital to manage patient’s profile, history and treatment. For a client from Italy, but worldwide usage, developed as a freelancer.

Other projects can be viewed with related feedback on my freelancing profile. Link: <https://www.upwork.com/fl/vepa>
